PROJECTS

BlogPost

Fullstack web application

MongoDB, Express.js, React, Node.js, JavaScript

- A web application similar to Reddit, developed on the MERN stack where registered users can create text and image posts
- Designed a responsive, intuitive user interface using Figma and implemented the front end through reusable React components
- Implemented RESTful API using a MongoDB database to store posts, pictures, user information, and comments

Task App

Native iOS and Android application

React Native, Expo, JavaScript

- Emphasized on user experience by designing intuitive and modern interface in Adobe XD
- Implemented functionality for creating tasks and setting goals
- Developed for native use on iOS and Android through Expo

Study Bot

Discord chat bot

Python

- Discord bot that responds to user commands in servers or direct messages
- Supports functionality to create a to-do list, set reminders, create flashcards, create private study rooms, and start polls
- Developed with the PyCord Discord API wrapper

EXPERIENCE

Banquet Server - Hyatt Regency Calgary

2018-Present

- Lead and mentored a team of banquet servers, ensuring all members are organized for exceptional service
- Collaborated with servers to guarantee high quality service in a prompt and courteous manner according to event order
- Communicated effectively with guests, resolving issues or concerns in a timely and professional manner
